(54) Title: COMB FILTER

(57) Abstract: In a method of compen-
sating errors in comb filters in a line-locked
sample domain, an input video signal
(CVBS) is delayed (LD1, LD2) by first and
second integral numbers of lines to obtain
first and second delayed signals, a phase
difference is measured (PM) between at
least two of the input video signal (CVBS)
and the first and second delayed signals, and
a phase of the input video signal (CVBS)
and a phase of the second delayed signal
are corrected (PC1, PC2) with respect to
the first delayed signal in dependence on the
phase difference.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the International filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the International filing date but later than the priority date claimed

- *T* later document published after the International filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *Z* document member of the same patent family
